855 of time, child up to age 7-8 yrs. generally ac-
[857] companying mother wherever she went.

Child of 7, 8 shown navel cord by mother; no
852 reason ascertainable; mother then buried cord outside house (SM) or kept it (FP); LT had lost cord belonging to her eldest son, but no misfortune attributed to this fact.

572 Two unrelated boys or 2 unrelated girls, when
857 about 8 yrs. old, often assumed chum relationship (na·mum); boys exchanged bows, arrows; girls, bracelets; this relationship lasted into adult life. Chums used each other's belongings freely, lived at each other's homes "as much as they wanted to," went out hunting and to get wood together; in later life would never assume face-washing relationship (p. 68) toward each other;
[582] man might marry his chum's sister, but this not obligatory.

852 Children approaching puberty frequently lectured by old man, woman relative at sundown, outside house; no sand paintings drawn. Speech to boys taken in text (Voegelin, 1935 b, 219); FP gave following speech for girls:

539 "Listen to me! I am an old woman and know what to do. Treat the people kindly. Don't be stingy; give visitors food; when they go home they will say good things about you. Don't talk about others (gossip maliciously). Don't stare at a person when you see him coming; you will
[838] see him when he arrives. Treat the old people
[841] well; do not dislike them; the old men too. Don't eat meat or grease when you have your menses; drink only warm water then. Use a stick to scratch your head at this time; if you don't, your hair
[836] will fall out. Don't be angry all the time; if you are, you will get old quickly."

881 Adolescence.- Boys' adolescence ceremony lack-
276 ing; both boys, girls after puberty enjoined to
776 take jimsonweed by old people, to obtain "life"; many did, but this not obligatory. SM said boys took ants, tobacco for same purpose, but that
[757] these were "too strong" for girls; FP had, however, taken all 3 for specific ailments and in hopes of obtaining "life" (see Autobiography of FP).

[262] At first menses girl ate no meat, grease, or salt for one month; drank only warm water for 6 days; during subsequent periods observed these taboos for length of period only. If menstruating woman ate meat, her husband would not see game (SM); violation of food taboos gave woman cough
[413] she would "never get over" (MM). Scratching stick used. No isolation of girl in separate hut; informants disagreed whether pit used; SM in 1931 said girl at first menstruation stayed in house, being put over little hole which had hot rocks underneath "like the hole a woman used when she had a baby," but that girl was not covered with anything; mother or old woman took care of girl. In 1932 SM denied pit was ever used, except at childbirth. FP said girl went about her ordinary occupations during first period; no pit used.

If person
787 in jimsonweed trance saw another person lacking
276 eyes, nose, leg, etc., it meant latter was going to die. This was why onlookers were afraid of person under influence of jimsonweed (FP). When person swallowed ants, number of ants he vomited foretold how long he would live.

RITUALS

788 Three rituals important among Tübatulabal: taking of jimsonweed to gain supernatural assistance, face washing to remove meat taboo, and mourning ceremony.

●886 Jimsonweed.- All boys, girls past puberty
788 urged to drink jimsonweed decoction in order to
796 obtain long life (ho·nun), but rite not obliga-
276 tory; "if they wanted to, they took jimsonweed; some were afraid to take it. Maybe if they didn't take it they'd die, when sickness came" (SM). Adults also drank jimsonweed to obtain visions; some persons took it several times.

[887] Group of 5-6 boys, or boys and girls, who were to take drink were put in charge of old man, who
788 took them into sweat house on winter evening,
796 kept them there for 3 nights, days. No speeches
276 made to young people during this time (SM); each morning they were given infusion of plant medicine to induce vomiting, and underwent same dietary restrictions to which person taking jimsonweed for medicinal purposes was subjected.

During morning of third day old man in charge dug jimsonweed roots; before digging them he addressed plant, saying, "Here I am digging you now; I want you to give these people something when they drink you, so they will have long life."
[462] Women never dug roots or administered drink. After roots dug, old man macerated them with round flat stone on metate, put them in large watertight basket filled with water and allowed them to soak for 10-12 hrs. In evening he strained off liquor into cooking basket; around sunset gave it to vision seekers to drink. If 6 persons drinking, about 2 gallons decoction prepared, each person taking one long drink. Decoction caused drinkers to fall into stupor which lasted until about midnight or longer; SM said they were not turned during sleep; FP said they were. When they awakened their eyes "were all red and watery."

[787] Visionaries fasted entire day after drinking jimsonweed; in 6 days considered to have recovered from effect of taking drug, and could by
[262] then drink thin acorn mush; refrained from eating meat or grease for 2 months.

Individuals, either adults or young boys, girls, fasted, drank decoction, either in their own house or in open, in foothills. Often father gave jimsonweed to son or daughter thus; women did not administer the drink.

787 While visionary in stupor induced by drug,
276 various animals appeared to him; one such might
776

[p. 69(a)]

881 171 among ruder hill tribes and is absent, or dwarfed, among more specialized lowland tribes (Handbook, 609; also 7, 135, 861); although these statements may apply to other parts of California, they do not seem to be upheld by Tübatulabal data.

231 794 No traces of bird cult found, although eagles were kept in captivity in order to obtain their feathers.

795 535 Ghost dance, social dances.- None of my informants remembered anything about Ghost dance, or Jack Wilson. Two forms of round dances mentioned; one was war dance of incitement, the other similar dance with men, women dancing in concentric circles, women on inside; this was danced at fiestas sometimes (FN), but no dance was ever given in order to bring dead back to [727] life (all informants). Massacre of 1863 (see Autobiography of FP) deprived Tübatulabal and Palagewan of nearly all their adult men and [797] thoroughly cowed survivors; by 1890 majority of Tübatulabal had become Catholicised and plans [177] were under way for granting each individual land; these plans were realized in 1893. Considering all these factors, as well as small size of group, there seems little reason to doubt informants' statements that neither Ghost dance of 1870 nor 1890 spread to Tübatulabal, although from their geographical position they might be expected to have had this dance.
